

### REMARKS

This amendment is being submitted to correct an informality in the specification which was corrected in the parent application. In particular, Figs. 10A-10C were included with the parent application as reviewed by the inventor at the time the declaration was executed for the parent application, are referred to on pages 22-23 of the specification as reviewed at the time of execution, and were included in the parent application as filed. The brief description of the drawings in the specification, however, does not mention these figures. Hence, the description thereof is being added to the brief description, as it was done in the parent application. As no new matter is being added and this amendment was entered and allowed in the parent application, please enter this amendment.

Applicant is also adding additional claims to prosecute in this application.

If any additional fee is due for this amendment, please charge our deposit account 50/1039.

Favorable consideration is earnestly solicited.

Respectfully submitted,

Date: November 11, 2003
